| <input type="checkbox"/> YES | Gas Pressure Gauge |
| <input type="checkbox"/> YES | Recovery Machine |
| <input type="checkbox"/> YES | Empty Recovery Cylinder |
| <input type="checkbox"/> YES | TEST Jumper Wires |
| <input type="checkbox"/> YES | Torch Set |
| <input type="checkbox"/> YES | Nitrogen Bottle |
| <input type="checkbox"/> YES | Nitrogen Regulator |
| <input type="checkbox"/> YES | Drill With An Assortment Of Bits |

This list is the minimum tools that any qualified technician should have in their possession if they are servicing HVAC equipment. Should a tool be required to complete a site visit, and the technician on the job does not have it, the site visit cannot be completed and will have to be rescheduled for a later date and an 185.00 dollar service fee will be assessed at the time of the site visit and a PO must be issued by the Service Company to Carrier Enterprise.

A limited supply of tools may be purchased on the jobsite from the Customer Assurance Manager with a PO if you have the proper account type. There is no guarantee that these will be available at all times.
